# SPIDA® SOFTWARE

A Bentley Company

ADD ORGANIZATION AND CONSISTENCY TO YOUR PROJECTS WITH SPIDA®studio – PROCESS MANAGER

Orchestrating all of the programs and projects within your organization can be challenging. The lack of effective tools and inter-department coordination can create conflict, confusion, and poor utilization of resources.

Unlike traditional process automation tools, SPIDAstudio – Process Manager puts the power of configuration in your hands for unprecedented visibility in work activities at the asset and the comprehensive evolution of your asset's life cycle.

Whether you are managing multiple ongoing programs or one-time projects, centrally manage and automate them all using SPIDAstudio's easy-to-use process automation capabilities. Track all work activities spanning multiple departments and access historical projects, documentation, and project logs, using Process Manager.
